

Curriculum And Technical Support

Academic Innovations is a mission-oriented publisher. That may mean different things to different people. For our Curriculum and Technical Support (CATS) team, that means our chief aim is to support you in your use of the *Career Choices* series curriculum.

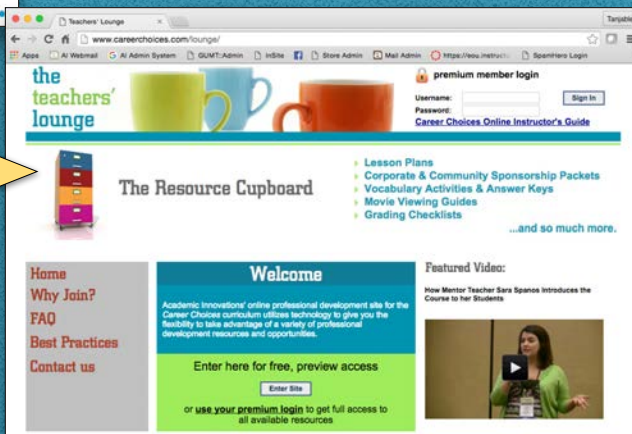

If you have any questions that arise in your planning and implementation of the *Career Choices* activities, supplemental materials, or online components, we are here to help!

A Sampling of Our Free Support Resources & Services

We are available to provide personal or team coaching by phone or online meeting. We can advise you on program planning or pacing, brainstorm or troubleshoot challenges your team is facing, or walk you through any of the *Career Choices* series materials.

The Teachers' Lounge is an extensive online library of helpful tips, classroom ideas, self-directed PD tools, and planning resources. Grab a cuppa and settle in to browse the possibilities.

The *Career Choices* Online PLC allows you to interact with our team and with *Career Choices* teachers from across the country. Tips and challenges shared in the PLC may be highlighted in weekly emails from our Director of Curriculum Support to benefit a wider group of *Career Choices* teachers.

Team Directory

Curriculum and Technical Support

Our focus: Supporting educators in creating and implementing effective *Career Choices* programs.

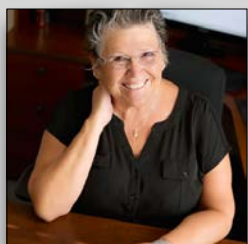

Our motto: *Changing attitudes, changing lives!*

Tanja Easson

Vice President,

Joined Academic Innovations in 1996

I love the creative problem solving I get to do every single day almost as much as I love hearing about the positive change that Career Choices teachers bring to their schools and their students.

Georgette Phillips

Director, Curriculum Support
